To Our Beloved Sovereign King George V

We, with all the world mourn as he was laid to rest in the Royal Chapel at Windsor.

Giving thanks to Almighty God for permitting so gracious and wise a king and Gentleman, to occupy the throne for the past 25 years.

We recall his own last personal Christmas Message to his world wide family "as the friend of all, the enemy of none surely a nobly Christian claim.

In His late Majesty King George, the whole world has lost a true friend, as he sought peace with his whole heart.

In very truth, word and deed a real Nobleman, loving faithful husband, devoted Father and wise King.

A man devoted without stint to his duty, to his peoples best welfare and the good of mankind.

He pledged his word as a boy to his illustrious Mother, the late Queen Alexandra that he would daily read his Bible and we believe it is to this fact mainly his faithfully honoring God's Word and meditation on it, that the rich blessings of Almighty God have been so generously showered upon him in his life, his family and peoples.

His steady purpose and unwavering integrity won for him the unstinted love of his people and the admiration of the world at large.

No sovereign hitherto has attained so unique a place in the hearts of all mankind as our late King George V who has now entered a well earned rest but his good deeds and fine Christian example will surely yield good results for the race at large.

Our deep sympathies are humbly extended to our sorrowing and bereaved Queen Mary in her great loss of a devoted husband, also her family.

A really great couple—King George and Queen Mary have given us, as a people, a wonderful heritage, in the family that has been blessed to their union.

We are looking through our sorrow, and giving thanks for the prospects before us, of the reign of so worthy a successor to the late King, in the person of Edward VIII. May God bless him and give him much wisdom in all his arduous duties and great responsibilities.

Long live the King.

Wedding Bells

FLATER—BANNICK
BROOKS (Special)—A quiet wedding was solemnized at the United Church manse, Brooks, on Monday, January 20, at 8 o'clock, when Edith daughter of Mr. and Mrs Emanuel Bannick, Brooks, became the wife of Mr Clifford Nicol Flater, son of Mrs. Otto Flater and the late Mr Flater of Duchess, Rev. R. R. Hinchney officiated.

The bride and groom were attended by Miss Elina Bannick, sister of the bride, and Mr. Clarence Galloway, of Brooks.

Mr and Mrs. Flater will reside on their farm at Duchess.

Prizes won at Junior Seed Fair

Robert Harrington and Maurice Massey were awarded first prize for having secured the greatest number of points at the Junior Seed Fair. They left Wednesday night for Calgary getting a free trip to attend the Seed Fair at that city.

'SHADA' TEA is delicious A Crime Invasion

Signs and portents are not lacking that Canada, including the prairie provinces, is to be favored during the coming summer with the presence of a horde of criminals from the United States bent on rapine and slaughter, with the peaceful citizens of this country as their victims.

Indeed, a migratory movement of the dregs and sweepings of the underworld of our neighbor to the south has already commenced and their unlawful and ruthless activities are already being recorded on the police blotter in some of the cities across the continent north of the 49th parallel.

Recent newspaper reports have noted during bank holdups, safe-blowings and robberies, accompanied in some cases by particularly cold-blooded and unnecessary murders, unnecessary even for the successful prosecution of the unlawful raids on property which are the primary aim of these crime perpetrators.

These undesirable visitors from across the line have made their presence felt in Vancouver, Calgary, Regina, Saskatoon, Winnipeg, Quebec and Toronto and have staged coups, sometimes with the assistance of local craftsmen with whom they have established contact, and in some cases without such aid.

So far this winter these desperadoes have confined their attention to the cities, principally because, in the western provinces at any rate, climatic conditions make criminal forays on the smaller towns and villages impracticable, if not impossible. With the advent of spring and after snow has disappeared and roads and highways become negotiable with ease, it is reasonable to assume that some of them will divert their activities in the direction of the small town merchant, the village post office and perhaps even to an occasional farm, unless their nefarious deeds are sternly checked.

The reason for this trek of bandits and thugs, armed with guns and saved-off shot guns, dynamite and nitro-glycerine, crowbars and jemmies is easily explained. They are being driven out like rats from the country which until recently has afforded them a fairly safe domicile and where they have been able to carry on their iniquitous trade with comparative immunity.

The federal government of the United States is tightening up on the robber and the killer. Substantial additions have been made to police and detective appropriations and forces and a campaign to suppress crimes, and especially crimes of violence, is well under way and is being carried out with a greater measure of success than has heretofore attended previous sporadic and isolated efforts in the land of the stars and stripes.

Many of the desperate criminals in the United States who have so far escaped the tightening meshes of the police nets in their own country are becoming fearful of their safety if they continue their illegal practices in their own land and are seeking pastures more green elsewhere. For geographical reasons alone they are turning their eyes towards Canada and their footsteps in this country. The advance guard is already here and more may be expected to come when weather conditions facilitate mobile transit.

The United States authorities are taking this action because public opinion in that country has made its voice heard. The people have demanded that steps be taken, if not to rid the country of serious crime, at least to reduce it to reasonable proportions. Hence, the drive now in progress. Unless, however, the people of this country are to inherit an unwanted legacy from the States, they, too, must make it known to the authorities that they stand four square behind every effort that can be made to repel an undesirable invasion.

The people and the federal authorities of the U.S.A. are to be commended for the effective campaign they are belatedly waging to rid themselves of a serious blotch on their social and economic life, but the people and authorities of this country must co-operate to see to it that the discarded spilling is not grafted on to our own tree.

The people of Canada do not want these visiting "gentlemen." They have no desire to afford them harborage. They have no wish to permit them to rob and slay innocent citizens, nor to allow them to establish schools for crime with our own criminals and potentials as pupils. For that will be the ultimate outcome if these people are treated with complacency and tolerance. Unfortunately, this country has enough lawless without importing more from outside.

Mayor G. C. McGeer of Vancouver, who visualizes this menace, declared recently that the police forces of this country are not adequately equipped to handle effectively such a dangerous invasion, stating in effect, that it is hopeless to cope with 20th century criminals with 19th century equipment.

If Mayor McGeer's inference is well founded it is time to be strengthening the defences. The governments of the country and the provinces will be well advised to spend the necessary money to bring police equipment up to date and to modernize their methods of securing information and of tracking down these foes of society.

Dangerous criminals, such as have infested Chicago and other American cities are not wanted in Canada. They should be caught as soon as they commence operations in this country. Once caught and the proper evidence produced to convict them, the Bench can be relied upon to deal with them effectively, in accord with the renowned tenets of British justice.

Linen Used By Prince

The Prince of Wales is using Irish linen luncheon cloths with napkins to match, in two-tone shades of blue, red, and yellow, at Fort Belvedere. He has ordered some of these to be copied by disabled soldiers in two sizes, one for breakfast and one for luncheon use.

The earth has supplies of energy to meet very need of man for thousands of years, according to Gustav Egloff, Chicago, in an address before the American Chemical Society.

All the electric light in use in the entire United States would illuminate an area of land equivalent as brightly as it is illuminated by sunlight.

All the oceans of the world combined contain 327,672,000 cubic miles of water; one cubic mile contains more than 1,100,000,000 gallons.

Not Very Encouraging

In a village in the Highlands the kirk required a new minister. One of the candidates, having preached, returned to the church after the service and began to inspect the building.

"I was just taking a look at the church," he exclaimed to the beadle, who was watching him rather grimly.

"Aye, well, tak' a guid look at it," came the unexpected warning "for it's no likely ye'll ever see it again."

For Up Trips Only

Use of the electric elevators in the palatial new court house in Nairobi, Kenya, is to be restricted. One rule is that they are for upward travel only. Government officers earning less than \$3,000 a year may not be permitted to ride in them at any time.

A California scientist says that freezing a person will kill all disease germs he may be harboring. It is also understood that decapitation will permanently cure dandruff.

Chinese movie fans of the Far East call Harold Lloyd "Luke."

Knows All The Records

All Criminals Dread Chief-Inspector Of Scotland Yard

After 36 years' service, the only man at Scotland Yard who knows the history of every one of the scores of gruesome exhibits in the "Black Museum" is retiring from the London Metropolitan Police. He is Chief-Inspector Ralph Rowe, head of the Criminal Records Office, the most dreaded of all Scotland Yard's departments by the habitual criminal. In that department are filed the records of over 600,000 criminals, and it is said at the "Yard" that Rowe knows them all by heart. Although by profession a "thief-taker," he has done much to set criminals on the right road after they have served their sentences.

From Soup To Dessert

Guests At Texas Dinner Had Soybean Menu

Guests at a dinner which opened the East Texas Chamber of Commerce Soybean Conference at Corsicana, ate soybeans—from soup to pie. Yes, pie.

Glen D. Davis, assistant manager of the chamber, said there would be soybean soup, soybean salad with soybean dressing, a soybean meat substitute, soybean vegetables, soybean bread, soybean pie, soybean coffee and—be promised proof—soybean milk.

In Yunnan province of China, superstitious natives direct that they be buried with their favorite books, to bring them luck and diversion on route to their celestial paradise.

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way to give your child a remedy is to ask him first. When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia" for your child.

So—always say "PHILLIPS' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know, made in Canada.

Safety for You and Yours
You can avoid illness by refusing to accept a substitute for the genuine "PHILLIPS' Milk of Magnesia." Do this in the interest of your children and the interest of the public in general.

Alberta's Fur Market

First Annual Sale In Five Years Attracts Buyers

Fur trade going to Edmonton this year promises to be equal to that of 1935, both in volume and quality, according to dealers.

The first annual sale held for five years concluded with total sales of \$100,000 worth of pelts of various kinds. Buyers were present from Milan, Italy, Vancouver, London, Montreal, Seattle, Toronto, New York and Winnipeg.

Among offerings disposed of was a consignment of 15,000 of weasel pelts. A large shipment of mink was also snapped up by buyers. Prices prevailing at the auction compared favorably with those on the Winnipeg market.

The total value of furs bought in Alberta for shipment last year amounted to \$2,000,000 and it is expected that this sum will be equalled this year by the end of the season.

Commendation of the quality of furs was expressed by Ricardo Bergmann and Joseph Milstein, of Milan, Italy, who represented one of the largest wholesale fur houses in southern Europe. The Italians made several large purchases, particularly of wolf pelts.

Canadian Scientist Honored

L. S. McLaine Elected President Of American Association Of Entomologists

At the recent annual meeting of the American Association of Economic Entomologists, held in St. Louis, December 30 to January 3, in affiliation with the American Association for the Advancement of Science, L. S. McLaine, chief of the Division of Foreign Pests Suppression, Entomological Branch, Dominion Department of Agriculture, was elected president for 1936.

Mr. McLaine has been associated with entomological and plant quarantine work in Canada since 1913. Largely as a result of his endeavors the Plant Inspection Service of Canada is regarded as one of the most efficient of its kind. The American Association of Economic Entomologists is the largest and most important organization of its kind in the world. The Canadian who was previously elected president of the association was the present Dominion entomologist, Dr. Arthur Gibson, who was elected in 1927.

SELECTED RECIPES

SOFT GINGER-BREAD

1/2 cup lard and butter mixed
1 cup sugar
1 cup molasses
1 cup sour milk
1 teaspoon Magic Soda
1 tablespoon boiling water
2 teaspoons each cinnamon and ginger
1 teaspoon each cloves and nutmeg
1/2 teaspoon salt
3 cups flour
1/2 teaspoon Magic Baking Powder
Melt shortening; put molasses into a bowl; pour on the hot melted shortening; add sugar, sour milk and boiling water. Mix well together. Sift together flour, baking powder, soda, spices and salt, and add to wet mixture. Beat briskly. Bake in a greased, shallow pan 40 minutes in 350 degrees F. oven. May be served as a dessert. Cut in squares and serve with whipped cream or a rich sauce.

Question Is Answered

Station Hand In Australia Proves Reptiles Eat Reptiles

Do reptiles eat reptiles? The problem has just been answered in tropical North Australia at least. A report by Austral News from Darwin states that one of the blacks on a large cattle station went into the bush to secure some choice food and returned with a large lizard or "goanna" lizard, 4 1/2 feet long. A station hand noticed something protruding from the lizard's mouth, gave it a tug and pulled out a snake as long as the lizard itself. The snake, incidentally, had partly consumed a large centipede. Evidently, during the meal the "goanna" had seized the snake unawares.

Royal Bank Of Canada 67th Annual Meeting

Morris W. Wilson, President and Managing Director, Sees Upward Trend of Business Definitely Established

Sydney G. Dobson, General Manager, Reports \$50,000,000 Increase in Deposits For Second Year in Succession

Basis for optimism for the immediate future is to be found in the complements of the past two years, stated Mr. Morris W. Wilson, President and Managing Director, in the course of his address at the 67th Annual Meeting of the Royal Bank of Canada.

"In every province of Canada," said Mr. Wilson, "the improvement in conditions has reduced unemployment and created increased purchasing power. To the farmers of the west, there is an almost immeasurable difference between a price of 40c and 90c for wheat and there is every prospect that by the end of the crop year, the carryover will be materially reduced. In the cities, the burdens and distress due to unemployment have been reduced by an expansion in all lines of manufacturing. In fact, in recent months the volume of manufacturing has exceeded that in the normal base year 1926."

Marked expansion in the automobile and allied industries, the chemistry and electrical industries, textiles and boots, were also noted by Mr. Wilson, who remarked that the substantial activity in the mining industry during the depression and its expansion in 1934-1935 have been outstanding elements in Canadian recovery.

Mining
"The payrolls of that industry," said Mr. Wilson, "provided generous employment for many of those employed in other industries were out of work. Without the expenditures of the mining industry for supplies, machinery and other items, the depression in Canada would have been much more severe. In spite of low prices and the low level of demand for building materials, the total volume of mineral production in 1935 again amounted to more than \$300,000,000. The volume of gold production attained a new high record of \$115,000,000. I am of the opinion that the great period of Canadian mineral production is in the future."

Unemployment
"While employment has shown some improvement during the past year, unemployment is still a major problem. Reduced expenditures constitute a threatening drain upon the resources of many local communities. Public recognition of our social obligations, I fear that these expenditures have not always been made with the regard to public interest that is promised survey by the Dominion Government is awaited with great interest."

Benefit of Contracts

Referring to the reproduction last year by one of the provinces of important long-term power contracts, Mr. Wilson said that alleged ground of that illegality, but it is noteworthy that disregarding all ordinary canons of British justice, the aggrieved investors have been denied access to the courts to press their claims. Moral considerations aside, the courts should be led to lightly disregard the policy of repudiating contracts that may have become burdensome because of changed conditions strikes at the very root of our social and economic life. Stated in its lowest terms, moreover, repudiation of contracts in the past we have made heavy sacrifices to build up and maintain our credit abroad. Unless some means can be found to remove the stain, this incident will be a permanent blot upon the fair name of our country.

Provincial Finances

"The financial position of some of our provinces has been the subject of frequent discussions during recent months. Economic conditions in Western Canada and abnormally heavy expenditures for relief resulting therefrom, have necessitated large advances from the Dominion Government. It was inevitable that sooner or later the question of control by the Federal Government over the finances of these provinces should be brought up, particularly in view of suggestions put forward that the Federal Government, by lending its credit, should assist in a general refunding of provincial debts so as to reduce the interest charge on these provinces. Such assistance by the Federal Government could only be justified if there were some effective safeguards against excessive borrowings by provinces in the future, a matter that would need to be involved in amendment to our constitution. With due safeguards, however, I believe that some such action would be warranted and receive the support of public opinion in Canada."

Foreign Trade

"Seven-eighths of our total foreign

Served On Warship "Canada"
King George V. was once an officer on a British warship named "Canada." It was in 1880, when a ship by that name was part of the fleet at the North American and West Indian station. It was a sub-tenant.

Ninety per cent. of the camphor used in India is burned in tiny quantities as a religious offering.

New Yorkers spend \$3,000 daily in telephoning for correct time.

trade in the past three years has been with the British Empire and the United States. The present upturn in business activity is associated with a rising demand for Canadian goods in the Empire markets and in the markets of the United States. In the twelve months ending in November, 1935 Canada's export to the Empire exceeded those of the same months of the previous two years by \$25 million and \$108 million respectively. Exports to the United States showed corresponding gains of \$54 million and \$100 million. Figures show that as yet Canada is not benefiting by any gains in general world buying power, but rather from the recovery which is under way in Great Britain and the United States. It would seem that Canada is indeed fortunate to have secured a favorable position in the world with her two best customers. While the agreement with the United States has been in effect but a few days, in view of the gain of \$100 million over the past two years, optimism as to further gains in export to the United States during 1936 is justified.

Summary

"I would not feel justified in closing my remarks without emphasizing that many serious problems still confront us."

"But neither can I close on a pessimistic note. The Canadian people have faced—and I sincerely believe have conquered—the depression. At this stage we must not listen to the faint-hearted who would have us fight or discouraged by the trials of recent years. Those who now have been driven to compromise as a solution of our financial problem are false prophets who have not correctly read the signs of the time. The Canadian people are made of sterner stuff."

"The upward trend in business which has been steadily and firmly established. In fact, I believe we may look forward to the coming year with a greater optimism than has been possible at any time in the past six years."

General Manager's Address

Mr. S. G. Dobson, general manager, referred to the financial statement, as follows:

"The Sixty-Sixth Annual Report and Balance Sheet reflect continuation of the upward trend of business which began in 1933, and which has progressed almost without interruption since 1931. Quick assets stand at \$42,673,881, or 98.72% of total liabilities, indicating the steady and continuous growth of the bank."

"A year ago we reported an increase of \$50,000,000 in deposits. This year we are able to report a further increase of over \$20,000,000, or a total of over \$100,000,000 in two years—an impressive amount. Deposits in Canada again increased in all provinces, the total deposits being up over \$11,000,000."

"Because of the continued lack of demand for commercial loans, the main outlet for investment of the additional deposits has been the purchase of Government and municipal securities. As a consequence, under these headings have increased by \$63,000,000 to \$196,000,000."

"Total assets during the year increased \$42,000,000, and are now \$800,919,700, the highest point reached since 1931. Quick assets stand at \$42,673,881, or 98.72% of total liabilities, indicating the steady and continuous growth of the bank."

"Total Loans in Canada increased \$2,898,094, while Call Loans outside of Canada decreased \$10,690,196."

"Current Loans in Canada have increased by \$2,898,094, while advances abroad by \$2,573,809. While there has been a considerable improvement in business conditions, so far recovery has not increased appreciably the demand for bank accommodation."

"Our Executive organization was recently enlarged by the appointment of three Assistant General Managers, namely, Burnham L. Mitchell, James Muir and Harold G. Hesler. Mr. Mitchell will continue to supervise Ontario business with headquarters in Toronto, and Mr. Muir and Mr. Hesler will, as heretofore, be attached to Head Office. All three are highly trained bankers of wide experience, who have spent their business lifetime in the service of the bank."

"On the last annual meeting, I ventured the opinion that we had every justification for looking forward to improved conditions during 1936. This expectation is now realized perhaps to an even greater extent than we had hoped for at that time. The outlook is still favorable and, as I see it, there is no reason why we should not enter 1936 with a feeling of optimism."

Punishment Fits Crime

Caught ill-treating his horse, a young driver was made to pay the penalty in Cologne, Germany. An indignant passer-by attached to the youth's neck a board bearing the message, "I am a horse-torturer," put him in the shafts and forced him to pull his own cart through the streets.

HOT BEDS

(Experimental Farm Notes)

The gardener at the Station will start to prepare the manure for his hot-beds the first week in March and while this is a month and a half away, the hot-bed is such a useful addition to the farm garden that it is not too early to give it consideration. A hot-bed is so very easily made and it not only provides the heat and shelter needed for starting early vegetables and flowers that are so greatly appreciated, but the use of a hot-bed makes it possible to grow many plants that would not mature or flower here if in the open.

Vegetables, including cauliflower, cabbage, celery, early head lettuce, tomatoes, peppers and others, are all started in the hot-bed, while even a greater number of annual flowers used for bedding purposes are started in this way. Some of these annuals include asters, snapdragons, petunias, stocks, lobelias, marigolds, jacksnips, pansies, phlox, galliards and cinerarias. Plans and details for making a hot-bed are given in the bulletin, "The Prairie Farmer's Vegetable Garden" No. 43, N. S., and a copy of this may be obtained by writing to this Station.

Following is an outline of the method followed here in preparing the manure used for heating the hot-bed.

Only quite fresh horse manure, containing about one-third straw, is used and not manure that is cold and rotten or which has already heated. During the first week in March the manure selected is placed along side of the hot-bed pit in a pile the length and width of the pit and about 3 feet high. In piling the manure is spread out in about 6 inch layers and each layer is tramped and then thoroughly sprinkled with water.

Seven to ten days after the manure has been first piled it is usually quite hot and ready to be put into the hot-bed pit. The bed is started from one end and the manure shaken in from a fork so that the long and short manure are well mixed. As in piling, the manure is put into the bed in even layers and here again each layer is well tramped and thoroughly sprinkled with water. With water added in this way and using manure with about one-third straw, heating or fermentation is slower in starting than it would be in richer and somewhat dryer mixture, but the heat is more uniform and lasts longer. Too much straw in the manure is to be avoided because it heats too slowly at the start and would get too hot later on. The pit, which is a couple of feet wider on all sides than the hot-bed frame is set on top. A six-inch layer of manure is then put inside of the frame, while the outside is well banked up with the same material.

Next the sashes are fitted on the frame. Incidentally unbleached cotton is used for most of the sash coverings here. Glass has some advantages but the cotton is very much cheaper and it has been used here for a number of years with very good results. The only danger in using this material is during very cold weather, but mats or canvas coverings have been found satisfactory in providing extra protection when needed.

Five or six days after the manure has been put in the pit the sashes are removed and the manure is tramped over to make it as level as possible and a five or six-inch layer of rich garden soil is put on top of the manure and the sashes are replaced. Later when the soil gets the hottest a little heat is allowed to escape by opening the sashes a little each day.

In five or six days after the soil has been added the temperature usually falls to somewhere between 60 and 90 degrees F., when the hot-bed is ready for use. No seeding is done and no plants are put in the bed until the temperature drops to 90 degrees or lower. A metal thermometer is used in obtaining the temperature of the soil. Another reason for delaying the seeding is to allow the weeds time to germinate so that many of these may be destroyed before seeding the crop.

NOTICE

A reorganization meeting of the Chinook and District School Fair for the year 1936 will be held on Saturday, Feb. 1st at 2 p. m.

NOTICE

A special meeting of the Ratepayers of Buffalo Plains and Popular School Districts will be held in the School on Saturday, Feb. 1st at 2 p. m. for the purpose of electing a trustee for each of these districts.

Aberhart explains New School Plan

Edmonton, Jan. 27.—(Special Dispatch) Proposed unification of school districts in Alberta will detract little from the autonomy of the individual districts, Premier Aberhart said Saturday in urging that rural citizens affected by the project communicate their own views to the government.

"Taxes will be collected as in the past," he said, "with this difference; a levy adequate to the needs of each area will be met by the larger division, and each district which demands individual improvements will have to raise its own rate above the average to meet the extra costs."

"The greatest benefit by the change will lie in the fact that one individual, or a few, in each school district, will not be able to influence the curriculum in that district. The needs of the whole division so as to give pupils there as wide a knowledge as possible will be considered and a curriculum will be set for that division."

May Petition for Teacher

"Teachers will be appointed by the divisional boards," but any district may petition for a particular teacher, or a certain type of teacher.

"District school boards will be retained, and all members may attend meetings of the divisional boards if they wish."

"Each subdivision will appoint a representative to the divisional board, which will represent probably 45 districts."

Legislation for the schools' reorganization is expected to be placed before the legislature soon after the session opens Feb. 6.

Pay \$80 to \$115 For Farm Horses

MONTREAL, Jan. 9 (C. P.)—Farm Horses from the prairies, Ontario and Quebec brought "a little stronger" prices compared with sales of a year ago, it was announced last night by A. S. Stewart, who saw some 300 change hands at his auction arena on Wednesday.

The first such auction in five years saw prices averaging from \$80 to \$115, said Mr. Stewart, who considered it "a fair price," though shippers claim they can't make any profit at these rates.

Mr. Richard Stewart who appointed delegate to the U. F. A. Convention at Edmonton, returned Sunday morning.

Mr. Jay Robison returned Sunday morning from Calgary where he spent a day and also Edmonton where he attended the U. F. A. convention.

Mr. N. D. Stewart returned Tuesday morning from Edmonton where he attended the U. F. A. convention.

Appointment of Returning Officer

The following officers were elected by the Collingwood Council namely:
Returning Officer — George Hutchison

Deputy R. O. Div. 1 — R. W. Mawdsley — Polling Station at his residence

Dep. R. O. Div. 3 — I. S. Naylor — Polling Station and School

Deputy R. O. Div. 5 — J. S. Massey — Polling Station his residence.

Effective Dec. 1st, local passenger train time changed bringing no. 9 from the East into Chinook at 1:41 A. M. No. 10 from Calgary leaves an hour and twenty minutes later than present. It now leaves Calgary at 7:30 p. m. and arrives in Chinook at 3:01 A. M.

FRIENDLESS PERSON TO HIS DOG
(By Kathleen Phyllis McEneaney, Gadsby, Alta., Canada)

O little brown-eyed fellow, you who know Naught of the stinging, grief-sharp winds that blow
The fertile fields of friendship bleakly bare
Of all sweet flowers rooted firmly there
(Did I say "firmly"? No, they shared my day
Of sunny bliss and then they slipped away—
These "friends" who so dislike the bitter grey tears—
So sure to come along with pacing

Of aching trouble and another's years;
My little friend, to you I say but this:
Stay by me now; give me no chance to miss
The great devotion in your tender eyes;
Sign of a loyalty beyond surmise:
You would not leave me in this time of pain
When clouds obscure the sun, and mocking rain
Drowns all my soul in misery's depths, again.
You will, I know, be true until the end;
Will prove that you, a dog, can be a friend.
